

# HAF Food Smart Families & Children Recipe Book

# Welcome

This recipe book supports basic kitchen skills and cooking techniques as well as a number of different healthy eating ideas for all the family and holiday scheme providers. Please use the best practice and safety guides included and be mindful of the risks present when younger children are using knives and are near heat or an open flame whilst cooking, ensuring children are supervised at all times.

We recommend you check the ingredients list for each recipe before you start, to ensure it meets any personal preferences or dietary requirements you may have - you can swap and change the ingredients to create different flavour combinations to suit you and to take into account local and seasonal access to food.

Cooking seasonally and locally, ensures we are eating food at it most nutritional as it requires less processing. This reduces the environmental impact, including transport and packaging, as well as making the food you buy cheaper.

Don't forget to check out our free downloadable supporting resources, including our Food Smart Skills Passport to track your skills and knowledge along the way and our cook-a-long videos of how to make the recipes included in this book.

## Kitchen Skills Explained

The below kitchen skills are referred to throughout these recipe methods and in our cook-a-long videos as well.

**Handle Grip**—Hold your knife firmly in your dominant hand with all the fingers wrapped around the centre of the handle and the thumb on the opposite side. This will ensure a secure grip.

**Bridge Hold** - Create a bridge over the food with your hand. The fingers should be on one side and the thumb should be on the other. Hold the food to be cut between the fingers and thumb creating a bridge. The knife should go through the bridge to cut the food.

**Safety:** This method ensures that fingers are out of the way as the knife cuts through the food and into the mat.

**Use:** This method is useful in lots of situations. It is especially useful for cutting circular items into halves and quarters, e.g. tomatoes, apples.

**Claw Grip**—Create a claw by partly curling your fingers together into a claw shape. Press the tips of your fingers (nails) against the food to be gripped and then lean your fingers slightly forward of your nails so that you can't see your nails when you look down on your hand.

**Safety:** This method ensures that fingertips are tucked out of the way and will not get caught by the knife.

**Use:** This method is used to secure items so they can be cut safely. It is the best method to use when food needs to be cut into slices or diced.

**Note:** If you find the claw grip difficult replace your claw with a fork to secure the food in place and continue to cut in the same way.

# Campfire Cooking Guidance

These guidelines will help to keep you safe if you wish to create some of our recipes using our campfire methods.

## Creating a Safe Zone

When cooking on any open fire it is important to ensure there is a safe zone in which to operate from. This should be outside of the fire area and should be marked if cooking with younger children.

You could use bricks or sticks to clearly show the safe distance to be from your fire. A responsible adult should be the only one allowed within the fire area. You must also ensure you have a bucket of water close by in case of any accidents.

## Fire Lighting

Wherever possible your fire should be off the ground in a suitable firepit or similar. This will prevent any surrounding wood or leaves from catching fire, protect the ground and will also keep your fire contained.

If you are using wood to burn ensure it is fully dried dead wood (there should be no green areas to the wood and it should snap easily rather than bend). This will reduce the amount of smoke your fire produces and will ensure it burns effectively.

Once your fire is lit it should never be left unattended.

## Ending Your Fire

Once you have finished with your fire you will need to ensure it is fully out before leaving it. By this time there should only be the hot embers at the base, use your water to slowly pour over them until you can no longer see any glow. When fully cooled dispose of in a safe and responsible way.

- Bowl
- Spoon
- Cup
- Chopping Board
- Toasting Sticks

### **Making your Cooking Stick -**

  - 2a. If required add flavouring at this stage - you could add something like rosemary or chilli
3. Add a little of your water at a time, stirring as you go
4. When the mix becomes difficult to stir, use your hands to bring together
5. Knead on a hard surface using a chopping board, until smooth and stretchy
6. Break into 4 smaller balls
7. Roll each ball into a long sausage shape
8. Wrap around a prepared stick, pressing down slightly to ensure it is secure
9. Hold over the embers of a fire for 15mins turning every 5minutes to ensure an even cooking heat
10. Remove from heat, allow to cool before removing from the stick

### Twirly Hot Dogs -

Once the bread has been baked and cooled enough to eat, add a cooked sausage to the middle to create a hot dog.

### Notes -

The cup size will depend on how much bread you wish to make

Use the same cup for all your measures

Using greenwood for your cooking stick will ensure that it does not burn when placed over the hot embers
