

Sometimes it is hard to know how the food we eat effects our bodies, do you know what the right fuel is for you? Keep a diary of all the food and drink you consume and the exercise you take part in each day for a week. Make sure you include all your snacks and drinks as well as your main meals. Compare what you have eaten to the exercise you have taken part in and see if they are balanced - are any healthy changes you could make?

Food 'v' Fuel

These are just some ideas of how much energy you use when you exercise.

Check the food labels on the things you like to eat.

Recommended Daily Calories				
Age	Daily Calories			
2 - 3yrs	1,000			
4 - 8yrs (Girls)	1,200			
4 - 8yrs (Boys)	1,400			
9 - 13yrs (Girls)	1,600			
9 - 13yrs (Boys)	1,800			
14 - 18yrs (Girls)	1,800			
14 - 18yrs (Boys)	2,200			

We all need Calories/energy to keep our bodies working but we need to make sure there is a palance.

Too many and our bodies can't process all the extra energy we give it.

Too little and our body and brain becomes tired quickly.
