## Eat The Rainbow - Activity Card

## || Why is this important? -

IEating 5-a-day supports our health and wellbeing, and by eating I different colors of fruit and vegetables we gain the maximum I amount of nutrients, vitamins and minerals our bodies need to I maintain good health.
I $39 \%$ of our daily intake of food should be fruit and vegetables yet I only $30 \%$ of people are getting their 5-a-day.

## IThe Challenge -

I Use the rainbow to identify different fruits and vegetables of all It the different colours - some are harder than others!

Out of all the fruits and vegetables you have thought of which have you tried before, never tried or haven't eaten for a while?

IAnd out of these how many have you eaten in the last week?
Spend some time re-trying fruits and vegetables that you might $I_{\text {not }}$ have eaten for a while or that are new or different. How could I you include more colour into what you eat each day to try to I make sure you get your 5-a-day?

Examples to try might include -

> Yellow - Lemon, Peaches, Banana
> Orange - Melon, Peppers, Pumpkin
> Red - Cherries, Apples, Tomatoes
> Purple/Blue - Blackcurrants, Grapes, Red Cabbage
> Green - Peas, Celery, Grapes
